DETAILED ACTION

Election/Restrictions

1. Claims 7-10 and 17-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10. Also, claims 11, 14-15, 20, 23 and 24 are withdrawn from further consideration because depend from a nonelected species.

Information Disclosure Statement

2. The information disclosure statement filed 8/6/03 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered. Foreign patent no. AT002658 has not been considered because there is no English translation.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the boundary faces must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 21 and 22 are indefinite because depend from a non-elected claim 20.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-2, 5-6, 16 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stauber in view of Aspinwall.

Stauber discloses the invention substantially as claimed including a knife support 59, a blade holder having a blade 39, a seam-shaped cutout (see Fig.8-9), boundary faces, a lock seam

(Fig. 7), a threaded bore and screw means (Fig. 9). Stauber does not show boundary faces extending at angle of $< 90^\circ$ with respect to each other. However, Aspinwall teaches the use of boundary faces (12, 19 and 21) extending at angle of $< 90^\circ$ with respect to each other (Fig. 7) for the purpose of increasing the useful life of the bit. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Stauber's device by providing boundary faces extending at angle of $< 90^\circ$ with respect to each other as taught by Aspinwall in order to increase the useful life of the holder blade and the blade.

8. Claims 12 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stauber in view of Aspinwall as applied to claim 1 above, and further in view of Kutchmarek.

The modified device of Stauber discloses the invention substantially as claimed except for a coating material like diamonds. However, Kutchmarek teaches the use of a coating material like diamonds for the purpose of having the strength and/or durability to efficiently cut. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Stauber's device by providing the coating material like diamonds as taught by Kutchmarek in order to obtain the strength and/or durability to efficiently trim products.

9. Claims 13 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stauber in view of Aspinwall as applied to claim 1 above, and further in view of Houser.

The modified device of Stauber discloses the invention substantially as claimed except for a curable adhesive. However, Houser teaches the use of a curable adhesive (col. 7, line 52-

67) for the purpose of attaching the blades. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Stauber's device by providing the curable adhesive as taught by Houser in order to reduce undesirable stresses in the blade due to the thermal expansion.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zurlo, Rathert and Hartlage are cited to show related device.
